

Engineering office for technical product development.
Mechanics, electronics and firmware.

we can

We implement your idea.
This is where we are strongest:

SENSOR TECHNOLOGY

- Development of new technologies
- Customisation
- Interface electronics

MEDICAL ENGINEERING

- Development of medical devices
- Safety and EMC acc. to 60601-1
- Approval

ROBOTICS

- Drive technology
- Control technology
- Power electronics

our specifics

What we offer and why we are better:

KNOW-HOW AND TOOLS

- Electronics design
- Firmware development
- Mechanical construction

FROM IDEA TO SERIAL PRODUCTION

- Feasibility studies
- Prototype development
- Industrialisation

COMPETITIVE PRODUCT

- Product strategy
- Cost optimisation
- Time to market
